

Maitry Bhamore

bhamoremaitry@gmail.com / 8000541577 / Surat, Gujarat

Summary

Highly skilled Flutter developer with over 4.4 years of experience in developing cross-platform mobile applications. Proficient in the Flutter framework and Dart programming language, with a strong understanding of mobile app development best practices. Experienced in designing intuitive user interfaces, implementing complex features, and optimizing app performance for both Android and iOS platforms.

As a team leader, I have successfully led cross-functional teams to deliver projects on time and within budget. With 2 years of leadership experience, I have demonstrated effective communication, delegation, and problem-solving skills. I foster a collaborative and inclusive team culture, encouraging creativity, innovation, and continuous improvement.

Passionate about leveraging Flutter technology to create innovative mobile solutions and leading teams to deliver exceptional results. Dedicated to continuous learning and professional development, I am committed to staying updated with the latest trends and advancements in mobile app development.

Experience

Flutter Team Leader

iRoid Solutions • Surat, Gujarat

05/2022 - Present

As a seasoned Flutter Team Leader, I have excelled in driving the success of mobile app development projects through effective leadership, technical expertise, and strategic planning. With a focus on fostering collaboration, innovation, and excellence, I have consistently delivered high-quality Flutter applications while leading and mentoring cross-functional teams.

Key Responsibilities:

1. Team Leadership and Mentorship
2. Project Management
3. Technical Strategy and Architecture
4. Cross-Functional Collaboration
5. Quality Assurance and Code Review:
6. Client Engagement and Stakeholder Management
7. Continuous Improvement and Innovation:

As a Flutter Team Leader, I am dedicated to driving the success of my team and delivering exceptional results for our clients. I am passionate about leveraging the power of Flutter technology to create innovative, user-centric mobile applications and look forward to contributing to the success of future projects.

Sr. Flutter Developer

iRoid Solutions • Surat, Gujarat

08/2021 - 04/2022

As a Senior Flutter Developer, I have demonstrated expertise in leading the development and delivery of sophisticated mobile applications using the Flutter framework. With a focus on innovation, efficiency, and user-centric design, I have consistently contributed to the success of projects by leveraging my extensive experience in mobile app development.

Flutter Developer

Logicwind • Surat, Gujarat

06/2020 - 07/2021

Throughout my role as a Flutter Junior Developer, I demonstrated a strong commitment to learning and professional growth, while making valuable contributions to the development efforts of the team. I am eager to continue building upon my experiences and skills in Flutter development as I progress in my career.

Flutter Intern

Coruscate ventures pvt. ltd • Surat, Gujarat

01/2020 - 05/2020

As a Flutter Intern, I played a vital role in supporting the development and implementation of mobile applications using the Flutter framework. Throughout my internship, I actively contributed to various stages of the app development lifecycle, gaining hands-on experience in coding, testing, and debugging mobile applications.

Project

Grape Market Place App

Description

The app offers a comprehensive e-commerce solution, facilitating seamless interactions between customers and vendors. Customers enjoy a user-friendly interface with features like advanced search, personalized recommendations, and social sharing. They can easily manage their profiles, track orders, and receive timely notifications. Vendors benefit from a dedicated app, enabling efficient management of inventory, orders, and communication with customers. Robust security measures ensure data protection, while analytics empower vendors to make informed decisions. Admins oversee user management, vendor registrations, and customer support, ensuring smooth operations and optimal performance.

Project

home-cooked-self-picked-app

Description

The app aims to develop mobile applications for a Tiffin service, facilitating the ordering process for both buyers and sellers. The mobile apps provide features such as user authentication, search functionality, seller information with menu items, cart management, recurring orders, secure payment integration, order history, refund requests, and distance-based filtering. Sellers can manage their menu items, pickup details, daily availability, order lists, and refund requests. The admin panel offers functionalities for managing buyers, sellers, transactions, and refunds. Key features include authentication via email and phone verification, integration with the Stripe payment gateway, and efficient order management for both buyers and sellers. The project's updated features include improved order management options and a summary generation tool powered by ChatGPT.

Project

Hey Tony App

Description

Develop mobile apps and web app that aim to facilitate collaborations by allowing business owners to post offers (targeting or highlighting the business or aspects of product or service) in specific areas or countries.

Description

An app for Nature/Sasquatch(Yeti) Lovers, Where they can listen to Different Nature audios, Get different reports of Sightings of a Yeti(Bigfoot), And can chat with an AI Assistant regarding BigFoot.

Project

Stork (child- transportation)

Description

The Stork Child Transportation app enables parents to schedule rides for their children, providing a secure and reliable transportation service. Parents can set pickup and drop-off locations, make payments, and live-track the driver's location during the ride. The app also supports recurring rides, allowing parents to set up regular transportation, like daily school pickups or recurring activities. Additional functionalities, such as automated notifications and ride history, ensure a safe and seamless experience for parents.

Project

Stork (Driver)

Description

The Stork Driver app is designed for drivers providing transportation services. The registration process requires uploading vehicle documents and a driver's license for verification. After approval from the admin, drivers can accept rides based on their availability and must verify rides with a pickup OTP and drop-off OTP for security. Upon completing a ride, payment is automatically transferred to the driver's account.

Project

Unlimited NOW

Description

Action-focused companion for mindfulness, affirmations, daily inspiration, and goal tracking.

Immerse yourself in a world of wellness, with the Unlimited NOW App. A companion for individuals, mums, and families, brimming with tools for mindfulness, affirmations, and the spirited Little Butt Kickings.

Let us help you put strategies in place and then monitor your goals and habits.

Use the journal to reflect on your emotions and receive contemplative questions.

The quotes will elevate your thoughts, and our random card generator brings forth spontaneous bursts of joy and clarity for you and your little cubs. Inspiration is at your fingertips.

Be kind and compassionate with yourself and others as you put daily actions into place.

Project

Loop App (Money)

Description

With Loop, sharing money with friends is quick, easy, safe, and hassle free.

We all share money, but keeping track can be a nightmare. Loop does all the hard work for you, by keeping tabs, sending reminders and managing all payments for you.

Split expenses without the hassle.

Add any shared expense between one or more friends and Loop will do the rest - reminding everyone when payments are due and taking care of things when it's time to settle up.

Settle-up with a couple of clicks.

Our in-app payments lets you share, borrow and manage all your payments securely and with ease.

Say goodbye to awkward convos.

Loop automatically notifies your friends and family when payments are due so you don't have to.
